SUMMARY

Frontend Developer specializing in building responsive, production-ready web applications with React and Next.js. Proficient in TypeScript, REST API integration, component-based architecture, and responsive UI development. Experienced collaborating with team members to deliver new features and improve existing systems. Strong foundation in state management, performance optimization, and writing clean, maintainable code. A quick learner who adapts readily to new technologies, tools, and changing requirements.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js (Beginner), Tailwind CSS, shadcn/ui

Databases: SQL, MongoDB

State Management: React Context API, Zustand

Tools & Platforms: Git, GitHub, Vercel, REST API Integration, Postman, npm

Practices: Responsive Design, Component Architecture, Performance Optimization, Quality Assurance & Testing

PROFESSIONAL EXPERIENCE

Frontend Developer — Baseline Net Pvt. Ltd. *July 2024 – Present*

- Build responsive, interactive, and user-friendly web interfaces for the company's software development projects.
- Develop reusable UI components to keep interfaces consistent and speed up feature development.
- Integrate REST APIs to connect frontend features with backend services.
- Troubleshoot and resolve technical issues, and optimize application performance.
- Collaborate with team members to deliver new features and improve the user experience of existing systems.
- Adapt quickly to new technologies, tools, and changing project requirements.

PROJECTS

Garud Security — *Performance Optimization, API Testing, System Benchmarking, Postman*

- Conducted comprehensive system testing, API integration validation, and performance enhancement—benchmarking bottlenecks, optimizing query latency, and ensuring operational reliability.

Heart Disease Prediction App — *React.js, Firebase, Firebase Authentication*

- Delivered a multi-step health assessment app with Firebase authentication and real-time data persistence for personalized risk evaluation.

Admin Dashboard — *React.js, Tailwind CSS, JavaScript, Shadcn UI*

- Built a responsive admin dashboard with modular data visualization widgets, theme toggles, and scalable component architecture.

E-Commerce Application — *React.js, Tailwind CSS, Context API*

- Built a responsive e-commerce UI with React Context API for global state, dynamic cart operations, product filtering, and real-time inventory display.

Movie Search Website — *React.js, REST API, JavaScript*

- Integrated a third-party REST API with debounced live search and dynamic rendering for a smooth browsing experience with optimized API call frequency.

EDUCATION

BSc. Computer Science and Information Technology (CSIT) — Orchid International College, Tribhuvan University *2021 – 2026*

Higher Secondary Education (Science) — Trinity International College *2018 – 2020*
